# Figure 3: CLI × CLI_cultural Interaction Matrix
## Brittle Rigidity vs Adaptive Stability

LOW COLLAPSE RISK
(Interaction > 0.30)

Quadrant IV
ADAPTIVE STABILITY
(Somalilandia)
OPTIMAL ZONE

Quadrant I
STABLE RIGIDITY
(Uruguay)

0.38

0.58

0.44

0.32

0.26

Collapse Risk Threshold (0.30)

Somalia Federal

Somalilandia

Uruguay

Chile

Argentina

Quadrant III
CHAOTIC FRAGILITY
(No cases)

Quadrant II
BRITTLE RIGIDITY
(Somalia Federal)
DANGER ZONE

HIGH COLLAPSE RISK
(Interaction < 0.30)

**CLI_cultural (Cultural Lock-In Index)** (y-axis)

**CLI (Constitutional Lock-In Index)** (x-axis)

Notes: Interaction scores shown next to data points. Collapse risk threshold (CLI × CLI_cultural = 0.30) divides high-risk zone (below curve) from low-risk zone (above curve). Somalia Federal (0.26) falls in Brittle Rigidity danger zone. Somalilandia (0.38) in Adaptive Stability optimal zone.
